## TENSION

Obtaining the correct tension is perhaps the single factor which can make the difference between a successful garment and a disastrous one. It controls both the shape and size of an article, so any variation, however slight, can distort the finished garment. Different designers feature in our books and it is **their** tension, given at the **start** of each pattern, which you must match. We recommend that you knit a square in pattern and/or stocking stitch (depending on the pattern instructions) of perhaps 5 – 10 more stitches and 5 – 10 more rows than those given in the tension note. Mark out the central 10cm square with pins. If you have too many stitches to 10cm try again using thicker needles, if you have too few stitches to 10cm try again using finer needles. Once you have achieved the correct tension your garment will be knitted to the measurements indicated in the size diagram shown at the end of the pattern.

## CHART NOTE

Many of the patterns in the book are worked from charts. Each square on a chart represents a stitch and each line of squares a row of knitting. Each colour used is given a different letter and these are shown in the **materials** section, or in the **key** alongside the chart of each pattern. When working from the charts, read odd rows (RS) from right to left and even rows (WS) from left to right, unless otherwise stated. When working lace from a chart it is important to note that all but the largest size may have to alter the first and last few stitches in order not to lose or gain stitches over the row.

## WORKING A LACE PATTERN

When working a lace pattern it is important to remember that if you are unable to work both the increase and corresponding decrease and vice versa, the stitches should be worked in stocking stitch.

## KNITTING WITH COLOUR

There are two main methods of working colour into a knitted fabric: **Intarsia** and **Fairisle** techniques. The first method produces a single thickness of fabric and is usually used where a colour is only required in a particular area of a row and does not form a repeating pattern across the row, as in the fairisle technique.

**Fairisle type knitting:** When two or three colours are worked repeatedly across a row, strand the yarn **not** in use loosely behind the stitches being worked. If you are working with more than two colours, treat the “floating” yarns as if they were one yarn and always spread the stitches to their correct width to keep them elastic. It is advisable not to carry the stranded or “floating” yarns over more than three stitches at a time, but to weave them under and over the colour you are working. The “floating” yarns are therefore caught at the back of the work.

**Intarsia:** The simplest way to do this is to cut short lengths of yarn for each motif or block of colour used in a row. Then joining in the various colours at the appropriate point on the row, link one colour to the next by twisting them around each other where they meet on the wrong side to avoid gaps. All ends can then either be darned along the colour join lines, as each motif is completed or then can be “knitted-in” to the fabric of the knitting as each colour is worked into the pattern. This is done in much the same way as “weaving-in” yarns when working the Fairisle technique and does save time darning-in ends. It is essential that the tension is noted for intarsia as this may vary from the stocking stitch if both are used in the same pattern.

## FINISHING INSTRUCTIONS

After working for hours knitting a garment, it seems a great pity that many garments are spoiled because such little care is taken in the pressing and finishing process. Follow the text below for a truly professional-looking garment.

## PRESSING

Block out each piece of knitting and following the instructions on the ball band press the garment pieces, omitting the ribs. Tip: Take special care to press the edges, as this will make sewing up both easier and neater. If the ball band indicates that the fabric is not to be pressed, then covering the blocked out fabric with a damp white cotton cloth and leaving it to stand will have the desired effect. Darn in all ends neatly along the selvage edge or a colour join, as appropriate.

## STITCHING

When stitching the pieces together, remember to match areas of colour and texture very carefully where they meet. Use a seam stitch such as back stitch or mattress stitch for all main knitting seams and join all ribs and neckband with mattress stitch, unless otherwise stated.

## CONSTRUCTION

Having completed the pattern instructions, join left shoulder and neckband seams as detailed above. Sew the top of the sleeve to the body of the garment using the method detailed in the pattern, referring to the appropriate guide:

**Straight cast-off sleeves:** Place centre of cast-off edge of sleeve to shoulder seam. Sew top of sleeve to body, using markers as guidelines where applicable.

**Square set-in sleeves:** Place centre of cast-off edge of sleeve to shoulder seam. Set sleeve head into armhole, the straight sides at top of sleeve to form a neat right-angle to cast-off sts at armhole on back and front.

**Shallow set-in sleeves:** Place centre of cast off edge of sleeve to shoulder seam. Match decreases at beg of armhole shaping to decreases at top of sleeve. Sew sleeve head into armhole, easing in shapings.

**Set-in sleeves:** Place centre of cast-off edge of sleeve to shoulder seam. Set in sleeve, easing sleeve head into armhole.

Join side and sleeve seams.

Slip stitch pocket edgings and linings into place.

Sew on buttons to correspond with buttonholes. Ribbed welts and neckbands and any areas of garter stitch should not be pressed.

SIZING GUIDE

SIZING & SIZE DIAGRAM NOTE

The instructions are given for the smallest size. Where they vary, work the figures in brackets for the larger sizes. One set of figures refers to all sizes. Included with most patterns is a size diagram, see image opposite of the finished garment and its dimensions. The measurement shown at the bottom of each size diagram shows the garment width. The size diagram will also indicate how the garment is constructed, for example if the garment has a drop shoulder, this will be reflected in the drawing. To help you choose the size of garment to knit please refer to the sizing guide. Generally in the majority of designs the welt width (at the cast on edge of the garment) is the same width as the chest. If you don't want to measure yourself, note the size of a similar shaped garment that you own and compare it with the size diagram given at the end of the pattern.

MEASURING GUIDE

For maximum comfort and to ensure the correct fit when choosing a size to knit, please follow the tips below when checking your size. Measure yourself close to your body, over your underwear and don't pull the tape measure too tight!

**Bust/chest** | measure around the fullest part of the bust/chest and across the shoulder blades.

**Waist** | measure around the natural waistline, just above the hip bone.

**Hips** | measure around the fullest part of the bottom.

Finally, once you have decided which size is best for you, please ensure that you achieve the tension required for the design you wish to knit.

Remember if your tension is too loose, your garment will be bigger than the pattern size and you may use more yarn. If your tension is too tight, your garment could be smaller than the pattern size and you will have yarn left over.

Furthermore if your tension is incorrect, the handle of your fabric will be too stiff or floppy and will not fit properly. It really does make sense to check your tension before starting every project.
